

RETROSPECTIVE VIEW OF OF A TRIP TO BHURBAN MURREE FOR THE OPHTHALMIC CONGRESS.

Murree, Murree...
A long term desire
Came true on 30.04.2009...!

We hurried to murree
Through...
Natiyagale
And many other
Beautiful valleys...!

Our brothers,
Didn't bother
About the weather,
...but it mattered !

I was shivering,
Few were
...in the coverings !

some were 'hydrophobic'
though
I was "hydrophilic" ,
And
Some were 'photophilic'...!

They got nausea,
Some got 'stomachache',
I had 'headache'
Common was 'body ache'
...because of the
Motion sickness...!¹

¹ State of being dizzy/nausea due to motion especially in traveling.

Poor coordination,
Poor time management,
Led to lose the
Free '*BHURBAN PC*² 'dinner...!

I got angry,
As I was hungry...!
But,
Murree's curries
Made me alright,
Though it was
Oily and little spicy...!

We entered to
'*USMANIYA*' restaurant,
the game was started,
they were fielding,
we were batting...!
We won the game,
But...
'man of the match '
was awarded to
usmaniya boss...!³

On my way to
Bazaar...
I saw some cherries,
I like cherries,
But,
Felt sorry,
Because of worry,
Of its high price...!

Different people,

² *BHURBAN Pearl Continental* is one of the popular hotel, where the ophthalmic congress was organized.

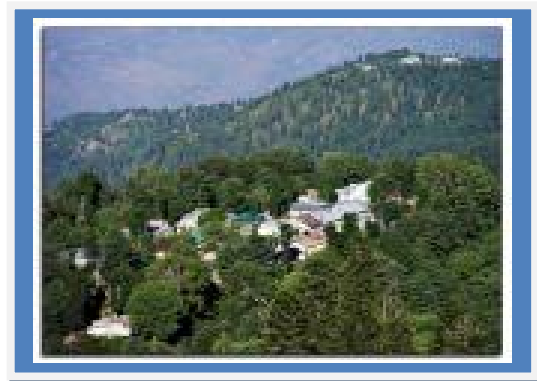

³ Very high bill was paid to the boss after the dinner

Different socio-cultural values,
Filled with...
Marry making activities,
Gave me a different
Aspect of the nation,
I... respect them..!

Lectures, lectures...
They were discussing,
'Glaucomatous cupping',⁴
some were mapping,
few were doing free shopping...
in the outlets...!⁵

They were highlighted,
About the importance of
'Report writing',
I was enlightened and
Certainly delighted.

Some were lengthy,
I was sleepy,
But I know,
It was informative and
...impressive!

Lectures were well oriented,
But they made me
Little disoriented,
As
They were curative
And
we were preventive...!

Overall...
it was ...
useful...
joyful...
and
fruitful for us,
furthermore,
I'm sure
It will...
Remain in our
Memories...
for ever...!

PICO ZINDABAD...!

MPH-Community Ophthalmology
-2009 Batch,
DISTRICT GENERAL- HOSPITAL,
NEGOMBO,
SRI LANKA.

⁴ Glaucoma is an important preventable blindness disease, where cupping is an important sign of the optic nerve head.

⁵ Free outlets were displayed by the drug companies at the congress.
